## GUIDED TOUR

### 01 RAMBOLL HEAD OFFICE

#### Working with new Standards for Sustainable Building and Design

The vision for Ramboll's new Head Office is to create a holistic and sustainable reference project. Specialists have worked on getting as many sustainable solutions implemented in the building as possible.

Ramboll is a leading engineering, design and consultancy company.

### 02 CPH CITY & PORT DEVELOPMENT

#### Developing the Grid for an Urban Rolemodel

Ørestad is to be a green city section, constructed around water and nature. Maximum utilization of both the transport infrastructure (the Metro) and the energy infrastructure makes it a rolemodel for modern green urban planning.

CPH City & Port Development creates urban districts of international class, attractive to live and work in and exciting to visit.

### 03 CTR AND VESTFORBRÆNDING

#### Creating a World Class Energy Infrastructure

Efficient planning and the development of energy carriers to better distribute energy from renewable sources are key elements in Denmark's unique energy model. One example of this is the energy efficient use of waste as a resource.

The Metropolitan Copenhagen Heating Transmission Company, CTR covers the Copenhagen area with district heating.

Vestforbrænding is an environmental company creating solutions in the waste management field.
